21 NSI 18

```python
In [ ]:  def insere(a, tab):
            l = list(tab) #l contient les mêmes éléments que tab
            l.append(a)
            i = ...
            while a < ... :
              l[i+1] = ...
              l[i] = a
              i = ...
            return l
```
